

## Canvas – Browser Requirements

### Canvas on Internet Browsers

Before you get started, it is highly recommended that you familiarize yourself with the user interface of our Learning platform.

Canvas supports the current and first previous major releases of the following browsers:

- **Chrome** 75 and 76
- **Firefox** 67 and 68
- **Edge** 44 (*Windows only*)
- **Safari** 11 and 12 (*Macintosh only*)

You should always use the most current version of your preferred browser. Your browser will notify you if there is a new version available.

### Unsupported Browser Banner

Some supported browsers may still produce a banner stating *Your browser does not meet the minimum requirements for Canvas*. If you have upgraded your browser but you are still seeing the warning banner, try logging out of Canvas and deleting your browser cookies.

### Canvas on Mobile Devices

The Canvas interface was optimized for desktop displays, so using small form factors such as phones may not be a pleasant experience in using Canvas. For the best user experience, please download the Canvas mobile applications.

Since Canvas uses small elements of Flash, not all Canvas features may be supported on mobile devices, especially on iOS. However, Canvas offers limited support for native mobile browsers on tablet devices. For additional details, please refer to the [limited-support mobile browser guidelines](#).

## Mobile Browsers

Visit the Apple Store or the Play store to download mobile browsers. The following major browsers are compatible with mobile devices:

### iOS

- Safari (default browser with limited Canvas support)
- Chrome
- Photon Flash Player (supports Flash)

### Android

- Chrome (default browser with limited Canvas support) \*
- Internet
- Firefox

*\*Android default browser varies per mobile device.*
